## MURALISMO MULTISENSORIAL

### Zone photographs process murals

Between 1937 and 1939, Orozco and his work team painted the *Hospicio Cabañas*, which is now our museum, a surface of 1200 square meters containing 57 murals across its side panels, vaults, and dome, which is 21.12 meters across and 25.82 meters long.

"Not once taking off the scaffolding, he painted the images fixated in his mind, trusting the freshness of improvisation, using nothing but some small notes, like a true visionary." (González Mello, R. 1995).
